

HIV PREVENTION EDUCATION

The Chester Board of Education believes HIV education should be integrated into the comprehensive health education curriculum, but may also be applied to other curriculum areas.

The district HIV education program must address, at a minimum, the nature, transmission, prevention and effects of the disease. The program shall be provided through a coordinated sequential elementary and secondary curriculum, taking into consideration the age, growth, development and maturity of the students and the subject matter of the course. Development of the program should take into account the instructional needs of all students in the district.

The chief school administrator shall ensure that the information presented as a part of the HIV prevention education program is articulated in such a way that transition from grade to grade in the elementary schools and from elementary to secondary approaches to the material will be appropriate for all students.

The chief school administrator shall be responsible for the preparation and development of an HIV prevention education program, with active consultation and participation of an advisory committee* consisting of teachers, administrators, parents/guardians, students (as appropriate), physicians, members of social and health service agencies, members of the clergy and representative members of the community. The board shall appoint the members of the committee upon the recommendation of the chief school administrator. The advisory committee shall be responsible for reviewing the instructional program and all materials to be used and, through the chief school administrator, of recommending same for board adoption.

The chief school administrator shall ensure that all staff involved in teaching the HIV prevention education program are properly certified for the subject area in which they are teaching and adequately prepared to teach the material. As necessary, appropriate staff training shall be provided.

The chief school administrator shall establish a process for evaluating and updating the HIV prevention education program to incorporate new information. Any such revisions shall be implemented after consultation with and review by an advisory committee as described above.

The board of education alone, upon the recommendation of the chief school administrator, shall determine the content, sequence, and materials of the HIV prevention education program. The board shall ensure compliance with all requirements of state and federal law concerning the content of the curriculum and distribution of materials.
